ACCESSIBILITY CONFORMANCE REPORT

Accessibility conformance report

brianna.health, the website of Brianna Meller Nutrition and Wellness

REPORT DATE	November 14, 2026
EVALUATED COPY	Pre-launch copy of brianna.health (staging), evaluated November 13 and 14, 2026; the published site is re-checked at launch
STANDARDS	WCAG 2.2 Level A, AA and AAA · Revised Section 508 · EN 301 549 V3.2.1
FORMAT	Based on VPAT® 2.5 INT (WCAG 2.2, Revised Section 508, EN 301 549 V3.2.1)
PREPARED BY	Coinsteam, the agency that built and maintains the site (first-party vendor evaluation)
CONTACT	accessibility@brianna.health

Also published as a web page at brianna.health/accessibility-report.

Executive summary

In plain words: brianna.health is built to work for people who use a keyboard instead of a mouse, screen magnification, larger text, high-contrast colours, reduced motion or a screen reader. Coinsteam, the agency that built and maintains the site, tested it against the international accessibility standard, the Web Content Accessibility Guidelines (WCAG) 2.2, at Level AA, the level most accessibility laws and policies refer to.

The result: everything Brianna publishes herself meets WCAG 2.2 Level AA. Two things on the site come from other companies and do not: the enquiry form on the Contact page, which is provided by Practice Better, her client platform, and six sample recipe PDFs from That Clean Life, her meal planning service, whose licence does not allow them to be changed. Because of those two, the site is described as **partially conformant** with WCAG 2.2 Level AA. Each has an alternative, set out in the accessibility statement.

The site also meets 14 of the stricter Level AAA criteria. The physician referral form, which Brianna publishes herself, was rebuilt as an accessible PDF that passes the PDF/UA-1 standard.

- Pages tested: every page, blog post and recipe, the search results, the page-not-found page and the downloadable PDFs.
- How: automated checks on every page, plus hands-on checks of keyboard use, colour contrast, zoom, text size, spacing, high-contrast colours, reduced motion, images and page structure.
- What was fixed: every problem the audit found in Brianna's own content was corrected before this report; the list is under "Remediation summary".
- Screen readers: NVDA with Chrome on Windows was run through every main journey (62 steps), by automation that pressed the keys and recorded what NVDA spoke. TalkBack 17 with Chrome on an Android 17 emulator was tested in 39 steps across 10 journeys, by automation that sent real touch gestures and recorded what TalkBack spoke. The problems they heard were fixed. The fixes were re-checked in the accessibility tree, without a new screen-reader run. The referral form was tested with NVDA 2026.3 in Adobe Acrobat Reader on Windows 11: title, reading order, headings, table navigation, all 19 fields in both directions and editing passed. VoiceOver (iPhone, Mac) and JAWS were not tested.

This is an evaluation by the site's own agency, not an independent certification. It describes the copy of the site named below, as of the report date.

About this report

Product and evaluation

Name of product	brianna.health, the website of Brianna Meller Nutrition and Wellness (Brianna Meller, RDN)
Report date	November 14, 2026

Evaluated copy	Pre-launch copy of brianna.health (staging), evaluated November 13 and 14, 2026; the published site is re-checked at launch
Product description	A brochure website for a registered dietitian's virtual nutrition practice: services, insurance coverage, FAQs, recipes, a blog, contact, legal pages and a physician referral form. Built on WordPress with custom templates and components by Coinsteam.
Evaluator	Coinsteam, the agency that designed, built and maintains the site (a first-party vendor evaluation)
Contact for the site	accessibility@brianna.health
Report format	Based on VPAT® 2.5 INT (WCAG 2.2, Revised Section 508, EN 301 549 V3.2.1), as an Accessibility Conformance Report
Evaluation methods used	WCAG-EM (W3C's Website Accessibility Conformance Evaluation Methodology): automated testing with axe-core on every page, manual expert testing in Google Chrome, source code review of every template and component, and PDF validation with veraPDF. Details under "Methodology".

Applicable standards and guidelines: this report covers the following standards. Every criterion of each is reported in the tables below.

Applicable standards and guidelines

Standard or guideline	Included in report
Web Content Accessibility Guidelines 2.0	Level A (Yes), Level AA (Yes), Level AAA (Yes)
Web Content Accessibility Guidelines 2.1	Level A (Yes), Level AA (Yes), Level AAA (Yes)
Web Content Accessibility Guidelines 2.2	Level A (Yes), Level AA (Yes), Level AAA (Yes)
Revised Section 508 standards, as published by the US Access Board in the Federal Register on January 18, 2017, corrected January 22, 2018	Yes
EN 301 549 Accessibility requirements for ICT products and services, V3.2.1 (2021-03)	Yes

Terms used in the Conformance Level columns

Term	Meaning
Supports	The functionality of the product has at least one method that meets the criterion without known defects, or meets it with equivalent facilitation.
Partially Supports	Some functionality of the product does not meet the criterion.
Does Not Support	The majority of product functionality does not meet the criterion.
Not Applicable	The criterion is not relevant to the product.
Not Evaluated	The product has not been evaluated against the criterion. Used only for WCAG Level AAA; not used in this report.

Conformance claim

brianna.health partially conforms to WCAG 2.2 Level AA. Everything published by Brianna Meller Nutrition and Wellness on the site (every page, post, recipe and template, and the physician referral form PDF) conforms to WCAG 2.2 Level AA. Two parts do not, for reasons outside the site's control:

1. **Third-party content: the Practice Better enquiry form on the Contact page.** The form is embedded from Practice Better, Brianna's HIPAA-compliant client platform; its markup is not under her control. Its fields are not connected to their labels, do not identify their purpose for autofill and explain required fields only with an asterisk (1.3.1, 1.3.5, 3.3.2, 4.1.2). This is a statement of partial conformance for third-party content: the Contact page

would conform if the form were removed. Alternatives: a free discovery call, Instagram, or fax for physician referrals, all listed in the accessibility statement.

2. **Excluded: the That Clean Life recipe PDFs, because of a licensing restriction.** Six sample recipes on the Home and Meal planning pages open as PDFs from That Clean Life, Brianna's meal planning service. The licence allows them to be shared only as the original, unaltered files, so they cannot be fixed or republished as web pages: remediation counts as altering them. They are untagged, have no title or language, and their images have no text alternative (1.1.1, 1.3.1, 1.3.2, 2.4.2, 3.1.1). On request, Brianna will help with any of these recipes in another format. Brianna's own recipes are web pages and conform.

In numbers, of the 87 rows of WCAG 2.2: Level A 17 Supports, 7 Partially Supports (each only because of the two parts above), 8 Not Applicable; Level AA 16 Supports, 1 Partially Supports (the Practice Better form), 7 Not Applicable; no Level A or AA criterion is Does Not Support.

Level AAA criteria met (14 of 31; WCAG does not recommend AAA as a requirement for whole sites, and this report does not claim AAA conformance):

- 1.4.9 Images of Text (No Exception)
- 2.1.3 Keyboard (No Exception)
- 2.2.3 No Timing
- 2.2.4 Interruptions
- 2.3.2 Three Flashes
- 2.3.3 Animation from Interactions
- 2.4.8 Location
- 2.4.9 Link Purpose (Link Only)
- 2.4.10 Section Headings
- 2.4.12 Focus Not Obscured (Enhanced)
- 2.5.6 Concurrent Input Mechanisms
- 3.1.6 Pronunciation
- 3.2.5 Change on Request
- 3.3.5 Help

The other Level AAA criteria are Not Applicable (9), Partially Supports (7) or Does Not Support (1); Table 3 gives the reason for each. Criteria that would change the design (enhanced contrast, line length, larger targets) were not pursued.

Technologies relied upon for conformance: HTML, CSS, WAI-ARIA and JavaScript; PDF for the documents.

Scope

The site is small enough to evaluate in full, so no sample was taken: every page, post and recipe listed in the site map, found by reading the site map and following every link on every page, was evaluated, together with the states and documents below.

Every web address evaluated (on the evaluated copy)

Search, empty query	/?s=
Search, no results	/?s=xyzzyq
Page not found (404)	/this-page-does-not-exist-a11y/

Templates: home, about, services index, service page (4), insurance, FAQ, recipes index, recipe, blog index, blog post (7), contact, legal (3), search results, empty search, no results, page not found. Every template and component was also read in source.

States: menus and submenus open and closed (desktop and mobile), FAQ answers open, the focused skip link, the header scrolled over every band, search with no query, no results, one page and three pages of results, the 404 page, JavaScript unavailable, reduced motion, forced colours (light and dark), larger default text, text spacing overrides, browser zoom from 100% to 500%, portrait and landscape. Empty lists and missing images were reviewed in source and template renders.

Documents evaluated

Document	Source	Result
Physician referral form (2 pages, 19 fillable fields)	Brianna's own document, rebuilt for this audit	In scope. veraPDF PDF/UA-1: 0 failed checks (3,846 passed); veraPDF WCAG 2.2 machine profile: 0 failed. Tagged headings, table and form fields, title, language, alternative text, contrast checked by hand.

Document	Source	Result
Six That Clean Life recipe PDFs (Massaged Kale Salad with Salmon; Turkey, Barley and Squash Soup; Shrimp and Black Bean Quinoa Bowl; Vanilla Berry Protein Smoothie; Brownie Protein Pancakes; Chicken Fingers and Fries)	Licensed from That Clean Life	Excluded from the conformance claim: the licence forbids altering them, remediation included. Evaluated anyway and reported: untagged, no title, no language, images without text alternatives.

Not in scope (third-party services the site links to): Practice Better's booking pages, client portal and intake forms; Instagram; research articles linked from blog posts. The Practice Better enquiry form embedded on the Contact page is in scope and reported as third-party content.

Methodology

The evaluation followed WCAG-EM: define the scope, explore the site, select (here: all of it), audit, report. Four audit passes worked in parallel (automated testing, inventory and documents; perceivable and robust criteria; operable and understandable criteria; source code), followed by fixes, an independent verification pass by a separate evaluator, and a final re-check of the last fixes.

Tools and versions

Tool	Version	Used for
Google Chrome on Windows (headless, driven by Playwright through Coinsteam's browser bridge)	156	Every page check
axe-core (Deque)	4.14.0	Automated WCAG 2.0, 2.1 and 2.2 A and AA rules and best practices, on every page
Chrome DevTools accessibility tree	Chrome 156	Names, roles, values and states of every control
Chrome forced-colours and reduced-motion emulation	Chrome 156	High-contrast and reduced-motion checks
Measurement scripts by Coinsteam	2026-11	Contrast from rendered pixels, focus rings, target sizes, reflow, clipping, reading level
veraPDF	1.30.4	PDF/UA-1 and WCAG 2.2 machine checks of the PDFs
pikepdf and PyMuPDF	10.13.0 and 1.28.2	PDF tags, fields, text order and colours

What was checked, in numbers

Check	Count
Web addresses (pages, posts, recipe, search states, 404)	31
PDF documents	7
axe-core runs (each page at 1440, 390 and 320 pixels wide, then repeated after the fixes)	154 (0 violations)
Keyboard focus stops recorded (Tab and Shift+Tab, three separate runs)	more than 12,000
Text colour pairs measured from rendered pixels	73
Distinct images checked against their text alternative by eye	51
Window sizes	1440×900, 1280×720, 720×450 (200% zoom), 390×844, 844×390, 320×640, 320×256 (400% zoom), and 22 sizes for the home page headline

Manual checks: keyboard operation of every control and menu; focus order, visibility and obstruction; colour contrast of text, focus rings, borders and icons; reflow at 320 pixels; browser zoom and larger default text; text spacing; forced colours; reduced motion; content on hover; image alternatives; headings, landmarks and reading order; link purpose; labels; page titles; language; reading level; the accessibility tree.

Limitations:

- Screen readers: NVDA 2026.3 with Chrome 157 on Windows 11, driven by an automated harness (Guidepup) that pressed the keys a user would and recorded every phrase NVDA spoke: 62 steps across 11 journeys. The four first-party problems it heard (word breaks in this report's tables, two missing spaces, a submenu still announced as expanded after Esc) were fixed and re-checked in the accessibility tree, not by a second NVDA run. TalkBack 17 with Chrome on an Android 17 emulator was tested in 39 steps across 10 journeys, driven by automation that sent real touch gestures and recorded what TalkBack spoke. The three problems it heard (the logo link's role, a missing space in search pagination, and column headings in two-column report tables) were fixed and re-checked in the accessibility tree, without a new TalkBack run. The referral form was tested with NVDA 2026.3 in Adobe Acrobat Reader on Windows 11: title, reading order, headings, table navigation, all 19 fields in both directions and editing passed. VoiceOver (iPhone, Mac) and JAWS were not tested.
- Web browsers: Chrome only; Edge, Firefox and Safari were not tested.
- High-contrast mode was Chrome's forced-colours emulation, not a real Windows contrast theme.
- The evaluated copy is the pre-launch site; the published site is re-checked at launch, and this report is re-dated then.
- This report page and its PDF were added after the evaluation and use the same templates as the accessibility statement; they are checked again with the published site.

WCAG 2.2 report

Each row: the success criterion and which other standards it maps to, the conformance level, and what was checked. "Also applies to" follows the VPAT INT edition: EN 301 549 V3.2.1 maps WCAG 2.1 Level A and AA (clause 9 for web pages, clause 10 for documents); Section 508 maps WCAG 2.0 Level A and AA.

Table 1: Success Criteria, Level A

Table 1: WCAG 2.2 Success Criteria, Level A

Criteria	Conformance Level	Remarks and Explanations
1.1.1 Non-text Content (Level A)	Partially Supports	Web pages: every informative image on the evaluated pages has a text alternative that matches the picture (each read against its image by eye: 51 distinct images), decorative artwork is hidden from assistive technology, and insurer logos are named. The physician referral form PDF tags its logo as a figure with alternative text. Excluded documents: the six That Clean Life recipe PDFs give their food photo and logo no text alternative. Also applies to: EN 301 549: 9.1.1.1 (web), 10.1.1.1 (documents). Section 508: 501 (web), 602.3 (support documentation)
1.2.1 Audio-only and Video-only (Prerecorded) (Level A)	Not Applicable	There is no audio or video on the site: a sweep of every evaluated page for video, audio, embedded objects, canvas and animated images found none. Also applies to: EN 301 549: 9.1.2.1 (web), 10.1.2.1 (documents). Section 508: 501 (web), 602.3 (support documentation)
1.2.2 Captions (Prerecorded) (Level A)	Not Applicable	No audio or video on the site (see 1.2.1). Also applies to: EN 301 549: 9.1.2.2 (web), 10.1.2.2 (documents). Section 508: 501 (web), 602.3 (support documentation)
1.2.3 Audio Description or Media Alternative (Prerecorded) (Level A)	Not Applicable	No video on the site (see 1.2.1). Also applies to: EN 301 549: 9.1.2.3 (web), 10.1.2.3 (documents). Section 508: 501 (web), 602.3 (support documentation)
1.3.1 Info and Relationships (Level A)	Partially Supports	Web pages: landmarks on every page, one main heading and no skipped heading levels, real lists and tables, native disclosure widgets for the FAQs (checked on every page in the browser's accessibility tree and by axe-core). The privacy policy's bold sub-headings were made real headings and a post's five strategies a real numbered list during the audit. The referral form PDF is fully tagged (headings, table with header cells, 19 form fields). Third-party exception: the Practice Better form's five fields show labels that are not connected to the fields. Excluded documents: the That Clean Life PDFs are untagged. Also applies to: EN 301 549: 9.1.3.1 (web), 10.1.3.1 (documents). Section 508: 501 (web), 602.3 (support documentation)
1.3.2 Meaningful Sequence (Level A)	Partially Supports	Web pages: reading order equals visual order on every template at desktop and phone widths (CSS placement checked, then keyboard and DOM order compared). The referral form PDF is tagged in reading order. Excluded documents: the untagged That Clean Life PDFs expose their nutrition panel before the recipe title. Also applies to: EN 301 549: 9.1.3.2 (web), 10.1.3.2 (documents). Section 508: 501 (web), 602.3 (support documentation)
1.3.3 Sensory Characteristics (Level A)	Supports	No instruction relies on shape, colour, size, position or sound (copy and templates reviewed). Also applies to: EN 301 549: 9.1.3.3 (web), 10.1.3.3 (documents). Section 508: 501 (web), 602.3 (support documentation)
1.4.1 Use of Color (Level A)	Supports	Links in text are underlined; the current page is marked by an underline and programmatically; no information is carried by colour alone. Also applies to: EN 301 549: 9.1.4.1 (web), 10.1.4.1 (documents). Section 508: 501 (web), 602.3 (support documentation)

Criteria	Conformance Level	Remarks and Explanations
1.4.2 Audio Control (Level A)	Not Applicable	No audio plays on any page. Also applies to: EN 301 549: 9.1.4.2 (web), 10.1.4.2 (documents). Section 508: 501 (web), 602.3 (support documentation)
2.1.1 Keyboard (Level A)	Supports	Everything is operable with a keyboard: real Tab and Shift+Tab runs through every template at desktop and phone widths and at 400% zoom (three separate runs, more than 12,000 focus stops in all) reached every link, button and disclosure; menus open and close with Enter, Space and Escape. The referral form PDF's fields follow the tag order. Also applies to: EN 301 549: 9.2.1.1 (web), 10.2.1.1 (documents). Section 508: 501 (web), 602.3 (support documentation)
2.1.2 No Keyboard Trap (Level A)	Supports	Every run left the page and wrapped. The open mobile menu keeps focus inside it on purpose and is released by Escape or its Close button. Tab moves through the Practice Better frame and out again. Also applies to: EN 301 549: 9.2.1.2 (web), 10.2.1.2 (documents). Section 508: 501 (web), 602.3 (support documentation)
2.1.4 Character Key Shortcuts (Level A)	Supports	There are no single-character shortcuts: the site's script handles only Escape, Enter, Space and Tab. Also applies to: EN 301 549: 9.2.1.4 (web), 10.2.1.4 (documents). Section 508: does not apply (WCAG 2.1)
2.2.1 Timing Adjustable (Level A)	Not Applicable	No time limits: no sessions, timed content or automatic redirects. Also applies to: EN 301 549: 9.2.2.1 (web), 10.2.2.1 (documents). Section 508: 501 (web), 602.3 (support documentation)
2.2.2 Pause, Stop, Hide (Level A)	Supports	The home page's entrance animation ends within 5 seconds; nothing moves, blinks, scrolls or updates on its own after that. Scroll effects are switched off when the reader asks for reduced motion. Also applies to: EN 301 549: 9.2.2.2 (web), 10.2.2.2 (documents). Section 508: 501 (web), 602.3 (support documentation)
2.3.1 Three Flashes or Below Threshold (Level A)	Supports	Nothing flashes. Also applies to: EN 301 549: 9.2.3.1 (web), 10.2.3.1 (documents). Section 508: 501 (web), 602.3 (support documentation)
2.4.1 Bypass Blocks (Level A)	Supports	A "Skip to content" link is the first Tab stop on every page and moves focus to the main content; every page has landmarks and headings. Also applies to: EN 301 549: 9.2.4.1 (web). Section 508: 501 (web), 602.3 (support documentation)
2.4.2 Page Titled (Level A)	Partially Supports	Every web page has a unique, descriptive title, search pages and the not-found page included. The referral form PDF has a title that viewers display. Excluded documents: the That Clean Life PDFs have no title, so viewers show the file name. Also applies to: EN 301 549: 9.2.4.2 (web), 10.2.4.2 (documents). Section 508: 501 (web), 602.3 (support documentation)
2.4.3 Focus Order (Level A)	Supports	On every keyboard run the order was: skip link, header, main content top to bottom, footer; Shift+Tab was the exact reverse. The mobile menu leaves the Tab order as soon as it closes. Also applies to: EN 301 549: 9.2.4.3 (web), 10.2.4.3 (documents). Section 508: 501 (web), 602.3 (support documentation)
2.4.4 Link Purpose (In Context) (Level A)	Supports	Every link names its destination in its context; PDF links say "PDF" and give the file size. Also applies to: EN 301 549: 9.2.4.4 (web), 10.2.4.4 (documents). Section 508: 501 (web), 602.3 (support documentation)
2.5.1 Pointer Gestures (Level A)	Supports	No multipoint or path-based gestures. Also applies to: EN 301 549: 9.2.5.1 (web), 10.2.5.1 (documents). Section 508: does not apply (WCAG 2.1)
2.5.2 Pointer Cancellation (Level A)	Supports	All actions are native links and buttons, which act on release. Also applies to: EN 301 549: 9.2.5.2 (web), 10.2.5.2 (documents). Section 508: does not apply (WCAG 2.1)

Criteria	Conformance Level	Remarks and Explanations
2.5.3 Label in Name (Level A)	Supports	Every control's accessible name is or starts with its visible label; added hidden words follow the visible ones. The referral form PDF's field names equal their visible labels. Also applies to: EN 301 549: 9.2.5.3 (web), 10.2.5.3 (documents). Section 508: does not apply (WCAG 2.1)
2.5.4 Motion Actuation (Level A)	Not Applicable	No function is operated by moving the device. Also applies to: EN 301 549: 9.2.5.4 (web), 10.2.5.4 (documents). Section 508: does not apply (WCAG 2.1)
3.1.1 Language of Page (Level A)	Partially Supports	Every web page declares English (en-US); so does the referral form PDF. Excluded documents: the That Clean Life PDFs declare no language. Also applies to: EN 301 549: 9.3.1.1 (web), 10.3.1.1 (documents). Section 508: 501 (web), 602.3 (support documentation)
3.2.1 On Focus (Level A)	Supports	Moving focus never changes the context. Also applies to: EN 301 549: 9.3.2.1 (web), 10.3.2.1 (documents). Section 508: 501 (web), 602.3 (support documentation)
3.2.2 On Input (Level A)	Supports	The search form submits only on its button or Enter. Also applies to: EN 301 549: 9.3.2.2 (web), 10.3.2.2 (documents). Section 508: 501 (web), 602.3 (support documentation)
3.2.6 Consistent Help (Level A)	Supports	The contact link, the discovery-call link and the footer "Get in touch" block are in the same place on every page. Also applies to: New in WCAG 2.2: not part of EN 301 549 V3.2.1 or Section 508
3.3.1 Error Identification (Level A)	Not Applicable	No first-party input detects errors: search accepts any query. The Practice Better form was not evaluated (third-party content). Also applies to: EN 301 549: 9.3.3.1 (web), 10.3.3.1 (documents). Section 508: 501 (web), 602.3 (support documentation)
3.3.2 Labels or Instructions (Level A)	Partially Supports	Web pages: the search field has a visible label that says what it searches. The referral form PDF's fields sit beside visible labels. Third-party exception: the Practice Better form marks required fields with an unexplained asterisk. Also applies to: EN 301 549: 9.3.3.2 (web), 10.3.3.2 (documents). Section 508: 501 (web), 602.3 (support documentation)
3.3.7 Redundant Entry (Level A)	Not Applicable	No multi-step process on the site asks for information. Also applies to: New in WCAG 2.2: not part of EN 301 549 V3.2.1 or Section 508
4.1.1 Parsing (Level A)	Supports	WCAG 2.2 removed this criterion as obsolete; it is always satisfied. For WCAG 2.0 and 2.1 (Section 508, EN 301 549): no duplicate ids on any evaluated page. Also applies to: EN 301 549: 9.4.1.1 (web), 10.4.1.1 (documents). Section 508: 501 (web), 602.3 (support documentation)
4.1.2 Name, Role, Value (Level A)	Partially Supports	Web pages: menus, submenus and disclosures expose their names, roles and open or closed state; the current page is marked (checked in the accessibility tree). The referral form PDF's 19 fields are tagged and named. Third-party exception: the Practice Better form's five fields have no accessible name. Also applies to: EN 301 549: 9.4.1.2 (web), 10.4.1.2 (documents). Section 508: 501 (web), 602.3 (support documentation)

Table 2: Success Criteria, Level AA

Table 2: WCAG 2.2 Success Criteria, Level AA

Criteria	Conformance Level	Remarks and Explanations
1.2.4 Captions (Live) (Level AA)	Not Applicable	No live audio or video. Also applies to: EN 301 549: 9.1.2.4 (web), 10.1.2.4 (documents). Section 508: 501 (web), 602.3 (support documentation)

Criteria	Conformance Level	Remarks and Explanations
1.2.5 Audio Description (Prerecorded) (Level AA)	Not Applicable	No video on the site (see 1.2.1). Also applies to: EN 301 549: 9.1.2.5 (web), 10.1.2.5 (documents). Section 508: 501 (web), 602.3 (support documentation)
1.3.4 Orientation (Level AA)	Supports	Pages work in portrait and landscape (checked at 390 by 844 and 844 by 390 pixels); nothing locks the orientation, and pinch zoom is allowed. Also applies to: EN 301 549: 9.1.3.4 (web), 10.1.3.4 (documents). Section 508: does not apply (WCAG 2.1)
1.3.5 Identify Input Purpose (Level AA)	Partially Supports	Web pages: the only first-party field is the site search, which asks nothing about the user, so the criterion does not apply to it. Third-party exception: the Practice Better form asks for name, email and phone without identifying their purpose for autofill. Also applies to: EN 301 549: 9.1.3.5 (web), 10.1.3.5 (documents). Section 508: does not apply (WCAG 2.1)
1.4.3 Contrast (Minimum) (Level AA)	Supports	Every distinct text colour pair on every evaluated page was measured against the rendered pixels behind it, so photos and gradients count (73 pairs at desktop and phone widths, plus menus open, the focused skip link and the header over each band). Lowest ratio for text: 5.14:1. The referral form PDF's large headings are 3.03:1 and its body text 14.41:1. The Practice Better form inside its frame was not measured (third-party content). Also applies to: EN 301 549: 9.1.4.3 (web), 10.1.4.3 (documents). Section 508: 501 (web), 602.3 (support documentation)
1.4.4 Resize Text (Level AA)	Supports	Browser zoom to 200% and larger default text (20 px, 24 px and 200%) lose no content or function on any evaluated page. Three blog cards clamp their summary to three lines; each card links to its post, which shows the same summary in full under the title, or opens with it (all 7 posts checked, exact text match). W3C's Understanding document for 1.4.4 accepts truncated text whose full content is one activation away. With larger default text the summaries show in full in place. Also applies to: EN 301 549: 9.1.4.4 (web), 10.1.4.4 (documents). Section 508: 501 (web), 602.3 (support documentation)
1.4.5 Images of Text (Level AA)	Supports	The only images of text are logotypes. The referral form PDF's NPI, address, phone and signature labels, drawn as outlines in the original, are real text in the rebuilt file. Also applies to: EN 301 549: 9.1.4.5 (web), 10.1.4.5 (documents). Section 508: 501 (web), 602.3 (support documentation)
1.4.10 Reflow (Level AA)	Supports	At 320 CSS pixels wide (400% zoom) no text or control runs past the window edge, nothing is clipped and nothing scrolls sideways, on all evaluated pages, at 320 by 640 and 320 by 256 pixels. The blog card summaries show in full at that width. Also applies to: EN 301 549: 9.1.4.10 (web), 10.1.4.10 (documents). Section 508: does not apply (WCAG 2.1)
1.4.11 Non-text Contrast (Level AA)	Supports	The focus ring (3 px, ochre) is 4.70:1 or more against every surface it was drawn on, control borders 5.14:1 or more, and meaningful icons pass. In Chrome's forced-colours emulation the logo, menu icon and FAQ plus and minus icons stay visible. Also applies to: EN 301 549: 9.1.4.11 (web), 10.1.4.11 (documents). Section 508: does not apply (WCAG 2.1)
1.4.12 Text Spacing (Level AA)	Supports	With the WCAG text-spacing overrides (line height 1.5, letter spacing 0.12, word spacing 0.16, paragraph spacing 2 times the font size) at 1440, 390 and 320 pixels wide, no text is lost or overlaps on any evaluated page; the blog card summaries switch to show in full. Also applies to: EN 301 549: 9.1.4.12 (web), 10.1.4.12 (documents). Section 508: does not apply (WCAG 2.1)

Criteria	Conformance Level	Remarks and Explanations
1.4.13 Content on Hover or Focus (Level AA)	Supports	The Services and About submenus, opened by hover or keyboard, can be dismissed with Escape without moving the pointer or focus, stay open while the pointer moves onto them, and stay until dismissed. The only tooltips are the browser's own on abbreviations, which the criterion exempts. Also applies to: EN 301 549: 9.1.4.13 (web), 10.1.4.13 (documents). Section 508: does not apply (WCAG 2.1)
2.4.5 Multiple Ways (Level AA)	Supports	Header and footer navigation on every page, a site search linked from every footer, breadcrumbs, and links in the content. Search results are paged with a labelled page navigation (checked with 25 results over 3 pages). Also applies to: EN 301 549: 9.2.4.5 (web). Section 508: 501 (web), 602.3 (support documentation)
2.4.6 Headings and Labels (Level AA)	Supports	Headings describe their sections; the search field's visible label says what it searches. Also applies to: EN 301 549: 9.2.4.6 (web), 10.2.4.6 (documents). Section 508: 501 (web), 602.3 (support documentation)
2.4.7 Focus Visible (Level AA)	Supports	Every focus stop in every keyboard run drew the same 3 px solid ring; none was missing. Also applies to: EN 301 549: 9.2.4.7 (web), 10.2.4.7 (documents). Section 508: 501 (web), 602.3 (support documentation)
2.4.11 Focus Not Obscured (Minimum) (Level AA)	Supports	No focused element was hidden by the fixed header or a sticky panel once scrolling settled, including Shift+Tab upwards at 1280 by 720 and at 400% zoom, where the header takes the largest share of the window. Also applies to: New in WCAG 2.2: not part of EN 301 549 V3.2.1 or Section 508
2.5.7 Dragging Movements (Level AA)	Not Applicable	Nothing is dragged. Also applies to: New in WCAG 2.2: not part of EN 301 549 V3.2.1 or Section 508
2.5.8 Target Size (Minimum) (Level AA)	Supports	Every target was measured at 1440 and 390 pixels wide: each is at least 24 by 24 px or meets the spacing exception, or is a link inside a sentence. Also applies to: New in WCAG 2.2: not part of EN 301 549 V3.2.1 or Section 508
3.1.2 Language of Parts (Level AA)	Supports	All content is in English; no passage in another language was found. Also applies to: EN 301 549: 9.3.1.2 (web), 10.3.1.2 (documents). Section 508: 501 (web), 602.3 (support documentation)
3.2.3 Consistent Navigation (Level AA)	Supports	The header and footer navigation are in the same order on every page (confirmed by the keyboard runs). Also applies to: EN 301 549: 9.3.2.3 (web). Section 508: 501 (web), 602.3 (support documentation)
3.2.4 Consistent Identification (Level AA)	Supports	The same functions carry the same names on every page. Also applies to: EN 301 549: 9.3.2.4 (web). Section 508: 501 (web), 602.3 (support documentation)
3.3.3 Error Suggestion (Level AA)	Not Applicable	No first-party input detects errors. The Practice Better form was not evaluated (third-party content). Also applies to: EN 301 549: 9.3.3.3 (web), 10.3.3.3 (documents). Section 508: 501 (web), 602.3 (support documentation)
3.3.4 Error Prevention (Legal, Financial, Data) (Level AA)	Not Applicable	Nothing on the site makes a legal or financial commitment or changes stored data; bookings and payments happen in Practice Better, which was not evaluated. Also applies to: EN 301 549: 9.3.3.4 (web), 10.3.3.4 (documents). Section 508: 501 (web), 602.3 (support documentation)
3.3.8 Accessible Authentication (Minimum) (Level AA)	Not Applicable	Visitors never sign in on the site. Also applies to: New in WCAG 2.2: not part of EN 301 549 V3.2.1 or Section 508
4.1.3 Status Messages (Level AA)	Not Applicable	There are no status messages: search results arrive as a new page with the count at the top. Also applies to: EN 301 549: 9.4.1.3 (web), 10.4.1.3 (documents). Section 508: does not apply (WCAG 2.1)

Table 3: Success Criteria, Level AAA

Table 3: WCAG 2.2 Success Criteria, Level AAA

Criteria	Conformance Level	Remarks and Explanations
1.2.6 Sign Language (Prerecorded) (Level AAA)	Not Applicable	No audio or video on the site. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
1.2.7 Extended Audio Description (Prerecorded) (Level AAA)	Not Applicable	No video on the site. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
1.2.8 Media Alternative (Prerecorded) (Level AAA)	Not Applicable	No video on the site. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
1.2.9 Audio-only (Live) (Level AAA)	Not Applicable	No live audio. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
1.3.6 Identify Purpose (Level AAA)	Partially Supports	Regions are identified with landmarks and named sections, controls are native HTML and icons are hidden from assistive technology. The Practice Better form's personal-data fields expose no purpose. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
1.4.6 Contrast (Enhanced) (Level AAA)	Does Not Support	19 of the 73 colour pairs fall between 5.14:1 and 6.94:1, mainly the sage link colour and the ochre label colour. Meeting 7:1 would mean darker brand colours; not pursued, because it changes the design. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
1.4.7 Low or No Background Audio (Level AAA)	Not Applicable	No audio. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
1.4.8 Visual Presentation (Level AAA)	Partially Supports	Colours can be overridden (forced colours apply), text is never justified, line spacing is 1.55 to 1.75 and nothing scrolls sideways at 200% text. Not met: prose lines run about 89 to 94 characters (the criterion asks for 80 or fewer) and paragraph spacing is less than 1.5 times the line spacing. Not pursued: it changes the design. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
1.4.9 Images of Text (No Exception) (Level AAA)	Supports	The only images of text are logotypes. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
2.1.3 Keyboard (No Exception) (Level AAA)	Supports	No function needs path-dependent input; the 2.1.1 evidence applies without exception. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
2.2.3 No Timing (Level AAA)	Supports	Timing is not part of any activity. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
2.2.4 Interruptions (Level AAA)	Supports	No pop-ups, banners, chat or automatic updates. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
2.2.5 Re-authenticating (Level AAA)	Not Applicable	Visitors never sign in on the site. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
2.2.6 Timeouts (Level AAA)	Not Applicable	The site keeps no visitor data that inactivity could lose. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
2.3.2 Three Flashes (Level AAA)	Supports	Nothing flashes. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
2.3.3 Animation from Interactions (Level AAA)	Supports	Scroll effects, reveal animations, hover zoom and smooth scrolling all switch off when the reader asks for reduced motion (checked by sampling every running animation with and without the setting). Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)

Criteria	Conformance Level	Remarks and Explanations
2.4.8 Location (Level AAA)	Supports	Breadcrumbs on every page except Home; the current page is marked in the header and footer navigation. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
2.4.9 Link Purpose (Link Only) (Level AAA)	Supports	Every link's own text names its destination. Two short labels carry a hidden continuation after their visible words ("Schedule here (book a session with Brianna)", "@dietitianbri on Instagram"). The privacy policy's bare web addresses name their destination by the address itself. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
2.4.10 Section Headings (Level AAA)	Supports	Pages, posts and recipes are organised under headings; the one post without headings sets its five strategies as a numbered list. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
2.4.12 Focus Not Obscured (Enhanced) (Level AAA)	Supports	No focused element was even partly covered by the fixed header or a sticky panel. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
2.4.13 Focus Appearance (Level AAA)	Partially Supports	The 3 px ring at a 3 px offset meets the size and contrast requirements, but a card that is focused before it has faded in shows its ring below 3:1 for about 150 to 510 milliseconds. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
2.5.5 Target Size (Enhanced) (Level AAA)	Partially Supports	Buttons and cards are 44 px or larger, but footer links (40 px tall), breadcrumbs (32 px), the submenu arrow buttons (32 by 44 px) and some header links are smaller. Not pursued: it changes the design. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
2.5.6 Concurrent Input Mechanisms (Level AAA)	Supports	Mouse, keyboard and touch all work; no input type is disabled. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
3.1.3 Unusual Words (Level AAA)	Partially Supports	Some insurance and clinical terms (superbill, coinsurance, deductible, prior authorization, CPT codes, medical nutrition therapy) are used without a definition or glossary. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
3.1.4 Abbreviations (Level AAA)	Partially Supports	The first use of each abbreviation on most pages carries its expansion, and units read as words. Some remain unexpanded: HIPAA on three pages, PCOS and DASH in related-post cards, FTR in two posts, and abbreviations inside search-result summaries. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
3.1.5 Reading Level (Level AAA)	Partially Supports	Most pages read at or below grade 9; the disclaimer, privacy policy, two posts and the accessibility statement read above lower-secondary level, with no simpler version. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
3.1.6 Pronunciation (Level AAA)	Supports	No word's meaning in context depends on how it is pronounced. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
3.2.5 Change on Request (Level AAA)	Supports	The only links that open a new tab, in one post, say so to assistive technology; nothing else changes context without a request. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
3.3.5 Help (Level AAA)	Supports	The search page explains what can be searched. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
3.3.6 Error Prevention (All) (Level AAA)	Not Applicable	The only first-party submission is a search, which changes nothing. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)
3.3.9 Accessible Authentication (Enhanced) (Level AAA)	Not Applicable	Visitors never sign in on the site. Also applies to: WCAG only (no EN 301 549 or Section 508 requirement)

Revised Section 508 report

Chapter 5 (Software): Not Applicable. The site is web content, not software, platform or authoring tool; WordPress's editing screens are not part of the product evaluated. Chapter 4 (Hardware): Not Applicable. Chapter 2 (E205, content) maps to the WCAG tables above.

Chapter 3: Functional Performance Criteria (also EN 301 549 clause 4.2)

Functional Performance Criteria

Criteria	Conformance Level	Remarks and Explanations
302.1 Without Vision (EN 4.2.1 Usage without vision)	Partially Supports	Web pages expose headings, landmarks, names, roles and states, and every function works by keyboard. Exceptions: the Practice Better form's fields have no accessible names; the That Clean Life PDFs are untagged (excluded). NVDA with Chrome on Windows was tested in 62 steps. TalkBack 17 with Chrome on an Android 17 emulator was tested in 39 steps across 10 journeys, by automation that sent real touch gestures and recorded what TalkBack spoke. The problems they heard were fixed and re-checked in the accessibility tree, without a new screen-reader run. The referral form was tested with NVDA 2026.3 in Adobe Acrobat Reader on Windows 11: title, reading order, headings, table navigation, all 19 fields in both directions and editing passed. VoiceOver (iPhone, Mac) and JAWS were not tested.
302.2 With Limited Vision (EN 4.2.2)	Supports	Browser zoom to 400% reflows to one column, larger default text and text spacing lose nothing, text contrast is 5.14:1 or more, focus rings are 4.70:1 or more, and forced colours keep every control visible.
302.3 Without Perception of Color (EN 4.2.3)	Supports	No information is carried by colour alone (see 1.4.1).
302.4 Without Hearing (EN 4.2.4)	Supports	There is no audio; nothing requires hearing.
302.5 With Limited Hearing (EN 4.2.5)	Supports	There is no audio.
302.6 Without Speech (EN 4.2.6 Usage with no or limited vocal capability)	Supports	Nothing requires speech. Every contact route (form, discovery-call booking, Instagram, fax) works without a voice call.
302.7 With Limited Manipulation (EN 4.2.7 Usage with limited manipulation or strength)	Supports	Everything works by keyboard; targets are at least 24 by 24 px or spaced; no gestures, dragging or time limits. In Adobe Acrobat Reader with NVDA 2026.3 on Windows 11, all 19 referral form fields were reached in both directions and editing passed.
302.8 With Limited Reach and Strength (EN 4.2.8 Usage with limited reach)	Supports	Nothing requires reach or strength beyond the visitor's own device; no device motion is needed.
302.9 With Limited Language, Cognitive, and Learning Abilities (EN 4.2.10)	Supports	Consistent navigation and help, no time limits, no interruptions, plain headings, and reduced motion on request. Some pages read above lower-secondary level (3.1.5, AAA).
EN 4.2.9 Minimize photosensitive seizure triggers	Supports	Nothing flashes.
EN 4.2.11 Privacy	Supports	The accessibility features (text alternatives, names, keyboard use) expose no personal information. The site collects no personal data itself; the Practice Better form does, under its own privacy terms.

Chapter 6: Support Documentation and Services (also EN 301 549 clause 12)

Support documentation and services

Criteria	Conformance Level	Remarks and Explanations
601.1 Scope	Supports	The site's support documentation is its accessibility statement and this report.
602.2 Accessibility and Compatibility Features (EN 12.1.1)	Supports	The accessibility statement describes the site's accessibility, the two exceptions with alternatives, and the technologies it relies on; this report describes each criterion.
602.3 Electronic Support Documentation (EN 12.1.2 Accessible documentation)	Supports	The accessibility statement is a page of the site and conforms (see the WCAG tables). This report is published as a web page in the same templates and as a tagged PDF that passes veraPDF's PDF/UA-1 checks.
602.4 Alternate Formats for Non-Electronic Support Documentation	Not Applicable	There is no printed documentation.
603.2 Information on Accessibility and Compatibility Features (EN 12.2.2)	Supports	Questions about accessibility go to accessibility@brianna.health, the contact page or a discovery call, and are answered by the practice.
603.3 Accommodation of Communication Needs (EN 12.2.3 Effective communication)	Supports	Several routes, none of which needs a voice call: email, the Contact page, Instagram, fax, and a discovery call booked online. Content is provided in another format on request.
EN 12.2.4 Accessible documentation (from support services)	Supports	Documentation given by the practice (the referral form, this report) is available as accessible PDF and web pages.

EN 301 549 report

Clause 4.2 (Functional performance statements) and clause 12 (Documentation and support services) are reported with the Section 508 tables above; clause 9 (Web) maps to the WCAG tables (EN 301 549 V3.2.1 requires WCAG 2.1 Level A and AA; the WCAG 2.2 additions are reported for completeness).

EN 301 549 clauses

Clause	Conformance Level	Remarks and Explanations
Clause 5 Generic requirements	Not Applicable	Applies to ICT with closed functionality, biometrics, locking or toggle controls, which the site does not have. 5.2 (activation of accessibility features) and 5.3 (biometrics): not applicable to web content.
Clause 6 ICT with two-way voice communication	Not Applicable	The site offers no voice communication.
Clause 7 ICT with video capabilities	Not Applicable	There is no video.
Clause 8 Hardware	Not Applicable	The site is web content.
Clause 9 Web (9.1 to 9.4)	See WCAG 2.2 report	Clause 9 maps one to one to WCAG 2.1 Level A and AA; each row of Tables 1 and 2 names its EN 9.x clause.
9.6 WCAG conformance requirements	Partially Supports	Same as the conformance claim: partial conformance because of the Practice Better form (third-party) and the That Clean Life PDFs (excluded, licensing).

Clause	Conformance Level	Remarks and Explanations
Clause 10 Non-web documents	Partially Supports	Physician referral form PDF: supports every applicable clause 10 requirement (veraPDF PDF/UA-1 and WCAG 2.2 machine profile: 0 failed checks; tags, title, language, alternative text, contrast and named fields checked by hand; NVDA 2026.3 in Adobe Acrobat Reader on Windows 11 passed title, reading order, headings, table navigation, all 19 fields in both directions and editing). That Clean Life recipe PDFs (excluded, licensing): do not support 10.1.1.1, 10.1.3.1, 10.1.3.2, 10.2.4.2 and 10.3.1.1. Each WCAG row names its EN 10.x clause; 10.2.4.1, 10.2.4.5, 10.3.2.3 and 10.3.2.4 are void in EN 301 549 V3.2.1.
10.5 Caption positioning; 10.6 Audio description timing	Not Applicable	The documents contain no media.
Clause 11 Software	Not Applicable	The site is web content, not software; 11.8 (authoring tools) does not apply because the product evaluated is the public website, not its editing tools.
Clause 12 Documentation and support services	Supports	See Chapter 6 above (12.1.1, 12.1.2, 12.2.2, 12.2.3, 12.2.4).
Clause 13 ICT providing relay or emergency service access	Not Applicable	The site provides no relay or emergency services.

Remediation summary

The four audit passes raised 37 Level A and AA findings (failures, partial passes and open questions). Every finding in Brianna's own content was fixed and re-checked on the evaluated copy before this report; what remains are the two declared exceptions and a few advisory notes that are not failures. The fixes, in plain words:

- Submenus opened by hovering can now be closed with the Escape key (1.4.13).
- The mobile menu leaves the keyboard order as soon as it closes, so Tab no longer lands inside a hidden menu (2.4.3).
- The logo shrinks with larger text so the header fits a 320 pixel window (1.4.10).
- In high-contrast (forced colours) mode, the logo, the menu icon and the FAQ plus and minus icons stay visible (1.4.11).
- The privacy policy's bold sub-headings became real headings, and a post's five strategies a real numbered list (1.3.1).
- Search results are paged, with a labelled page navigation, so results beyond the first 10 can be reached (2.4.5).
- Search and the page-not-found page no longer mark the Home link as the current page (4.1.2).
- Blog card summaries show in full when text is enlarged or spaced, or at 400% zoom; every post page now shows its summary under the title, so a clamped card summary is always available in full (1.4.4, 1.4.10, 1.4.12).
- The home page headline grows with browser zoom again, while keeping its fit on short screens (1.4.4).
- The physician referral form was rebuilt as a tagged PDF/UA-1 file with the same layout and wording: headings, a table with header cells, 19 named fields, a title and language, alternative text for the logo, real text in place of outlines, and the title and two headings darkened slightly to 3:1. Both referral links point to it (1.1.1, 1.3.1, 1.3.2, 1.4.3, 1.4.5, 2.4.2, 3.1.1, 4.1.2).
- Level AAA improvements with no visible change: abbreviations expanded on first use, units and the author line read as words, links that open a new tab say so, two short link labels carry a hidden continuation, and lists keep their list role in Safari (3.1.4, 3.2.5, 2.4.9).
- Panels that are taller than the window no longer stick, so their lower part cannot be hidden.
- Safeguards for future content: the tool that publishes posts now refuses images without real alternative text, empty headings, skipped heading levels and empty links.
- The accessibility statement was rewritten: WCAG 2.2 Level AA, partially conformant, the two exceptions with alternatives, and a dedicated address, accessibility@brianna.health.

Advisory notes (not failures, recorded for a future update): the mobile menu button is announced "Close, expanded" while open (accurate but repetitive); the About page marks three menu links as current; if the site's script fails to load, the mobile menu cannot open (the footer navigation still works; JavaScript is a relied-upon technology); at 320 pixels wide with a 24 px default text size, beyond the WCAG test conditions, the Contact page runs 9 pixels past the edge; the privacy policy's email address needs JavaScript to decode, through the hosting provider's email protection.

Attestation

Coinsteam designed, built and maintains brianna.health, so this is a **first-party vendor evaluation**, not an independent audit. It records, to the best of Coinsteam's knowledge and on the evidence described above, how the copy named under "Evaluated copy" met the standards listed, as of the report date. It is not a certification or a legal opinion, and it is no guarantee that the site conforms at any other time: pages, posts, third-party services and browsers change. Coinsteam recommends a re-evaluation after any significant change to the site, and at least once a year.

To report a barrier, or to ask for any content in another format, email accessibility@brianna.health.
